Scale Efficiently

Advanced Behavioral Analytics

TODAY   TOMORROW   ROADMAP

The ultimate solution for scaling security guard control monitoring stations. **viisights true** automatically handles all video verification alerts, while pinning the valid ones and filtering false alerts that are mostly originated by surveillance cameras motion detectors, which are highly sensitive to changing conditions (light, weather, bugs). **viisights true** is a guardian gateway software system powered by artificial intelligence, trained to reduce 70%-95% of video false alarms and improve supervision and control.
